## Apprenti WA

Modernizing apprenticeship programs through rapid credential verification

Apprenticeships

IT Workforce recovery

#### CHALLENGE

The Washington Technology Industry Association (WTIA) sought to digitize its Apprenti journeyman card to modernize and streamline the apprenticeship program through rapid credential verification. They also wished to offer students resume-building technology and an official link to the WA Department of Labor lookup tool.

#### WITHOUT MERIT

Apprenticeship programs often rely on paper journeyman cards which can't be easily accessed, updated, or shared. The lack of interoperable systems prevents apprentices from building an agile record of training and experience for career growth.

#### **MERIT'S SOLUTION**

Apprenti graduates now access verified digital journeyman credentials. These incorporate Credential Engine's Credential Transparency Description Language (CTDL) that captures, links, updates, and shares up-to-date information about credentials for easy organization and searchability.

Merit's Resume Builder tool simplifies showcasing training and experience for students. Interoperable technology links participants with the State of Washington Labor and Industries' Apprenticeship Program Directory.

### 

MERIT

Successful Apprenti graduates are filling industry gaps in Washington, one of the nation's leading technology employers. Women, persons of color, and U.S. veterans use Merit's digital programcompletion certificates to store an agile and verifiable record of training and experience.

The credentials incorporate the Credential Transparency Description Language (CTDL), developed by Credential Engine, that captures, links, updates, and shares up-to-date information about credentials for easy organization and searchability. Merit's Resume Builder enables program graduates to showcase career-path accomplishments.

# 66

Signing up for Merit was easy and painless, as was receiving my digital credential of Journeylevel status. I also appreciated that there is a link to the Washington State Department of Labor and Industries - I had no idea there was a public lookup tool for viewing apprenticeship status!
